PhD Student of the 38ᵗʰ cycle

ORCID: 0000-0002-1658-8932

Francesca obtained her Master Degree in Veterinary Biotechnological Sciences at University of Milan in 2022, with a thesis focused on novel approaches in regenerative medicine.

She is continuing her studies in this field as a doctoral student from the Experimental Medicine Ph. D. program of University of Milan.

The main focus of her work is the implementation of a reliable in vitro model for osteoarthritis, suitable for the screening of MSCs-derived conditioned media, as a future therapeutic strategy.
