

Emma Nozza

emma.nozza@unimi.it

PhD Student of the 38th cycle

ORCID: 0000-0002-1573-036X

In December 2019, Emma graduated in Biology Applied to Medical Research at the University of Milan. After a research fellowship in the field of genotoxicology, she became interested in endocrinology. Her PhD project will be focused on the study of the IGF2 pathway and particularly on its receptor IGF2R, with the aim of understanding its involvement in the context of adrenocortical carcinoma.
