

Jawdat Sandakly

PhD Student of the 38th cycle

ORCID: 0000-0002-5739-793X

After graduating in Genomics and Health from the Lebanese University in 2021, Jawdat worked as a research assistant and laboratory instructor at the American University of Beirut. He now joined the Experimental Medicine program and his project will be focused on investigating Rett Syndrome modifier genes in order to find new therapeutic targets for this disorder.
