PhD Student of the 38th cycle

ORCID: 0000-0001-9295-655X

I graduated in Pharmaceutical Chemistry and Technology in 2021. I worked as research fellowship in the field of immunology and I am currently enrolled in the International PhD Program in Experimental Medicine at Università degli Studi di Milano.

My project is focused on studying the role of MS4A proteins, a new class of molecules that might fine-tune immune cell activation, in order to identify new mechanisms controlling macrophages functions and activation.
