PhD Student of the 39th cycle

ORCID: 0009-0007-3710-622X

I graduated in Medical Biotechnology and Molecular Medicine in 2022. I worked as research fellow in the field of neuroscience for nine months. I am currently enrolled in the international PhD program in Experimental Medicine in the laboratory of Prof. Diego Fornasari at L.I.T.A.

My project is focused on studying Congenital Central Hypoventilation Syndrome, in particular the role of PHOX2B in differentiation of patient-derived iPSC-neurons.
