

Isabella Zafferri

Isabella.Zafferri@unimi.it

PhD Student of the 39th cycle

ORCID: 0009-0005-2989-9114

After graduating in Advanced Biotechnology at the University of Pavia, she studied the role of the post-translational modifier SUMO during embryonic development in mice at the Institut Pasteur.

Currently, she's a PhD student of XXXIX cycle in Experimental Medicine at University of Milan. During her PhD she will work with 3D culture system of human organoids, in particular, mini-guts from patient exosomes to personalize therapy in Crohn's disease.
