**PhD Student of the XL cycle**

**ORCID: 0009-0000-2218-9893**

Following her graduation in Pharmaceutical Biotechnology at University of Milan, Sonia obtained two research fellowships to work at the Endocrinology Laboratory at Fondazione IRCCS Ca' Granda Ospedale Maggiore Policlinico of Milan. Now she is enrolled in the XL cycle of the PhD program in Experimental Medicine at the same laboratory.

The aims of her project are to study and to manipulate the alternative splicing of the insulin receptor in adrenocortical carcinoma, a rare malignant tumour, and to evaluate the *in vitro* and *in vivo* downstream effects of this manipulation.
