

Enrico Pellegrini

PhD student of the XLI cycle

ORCID: 0009-0006-2564-7355

Graduated in Medical Biotechnology and Molecular Medicine in 2024 at the University of Milan, Enrico did a fellowship activity in the Laboratory of Neuroscience of *IRCCS Istituto Auxologico Italiano* under the supervision of Professor Antonia Ratti, and he is now spending in the same Laboratory his PhD in Experimental Medicine.

His project aims to establish and combine *in vitro* cellular models derived from induced pluripotent stem cells (iPSCs) for the study of amyotrophic lateral sclerosis (ALS), particularly focusing on the role of neuroinflammation in disease onset and progression.
